

# Make Prevention Contagious

**DON'T LET THE FLU GET TO YOU**

**Grandpa Mark and baby Easton** have a lot to smile about. They have their flu shots so they are building immunity for their whole community.

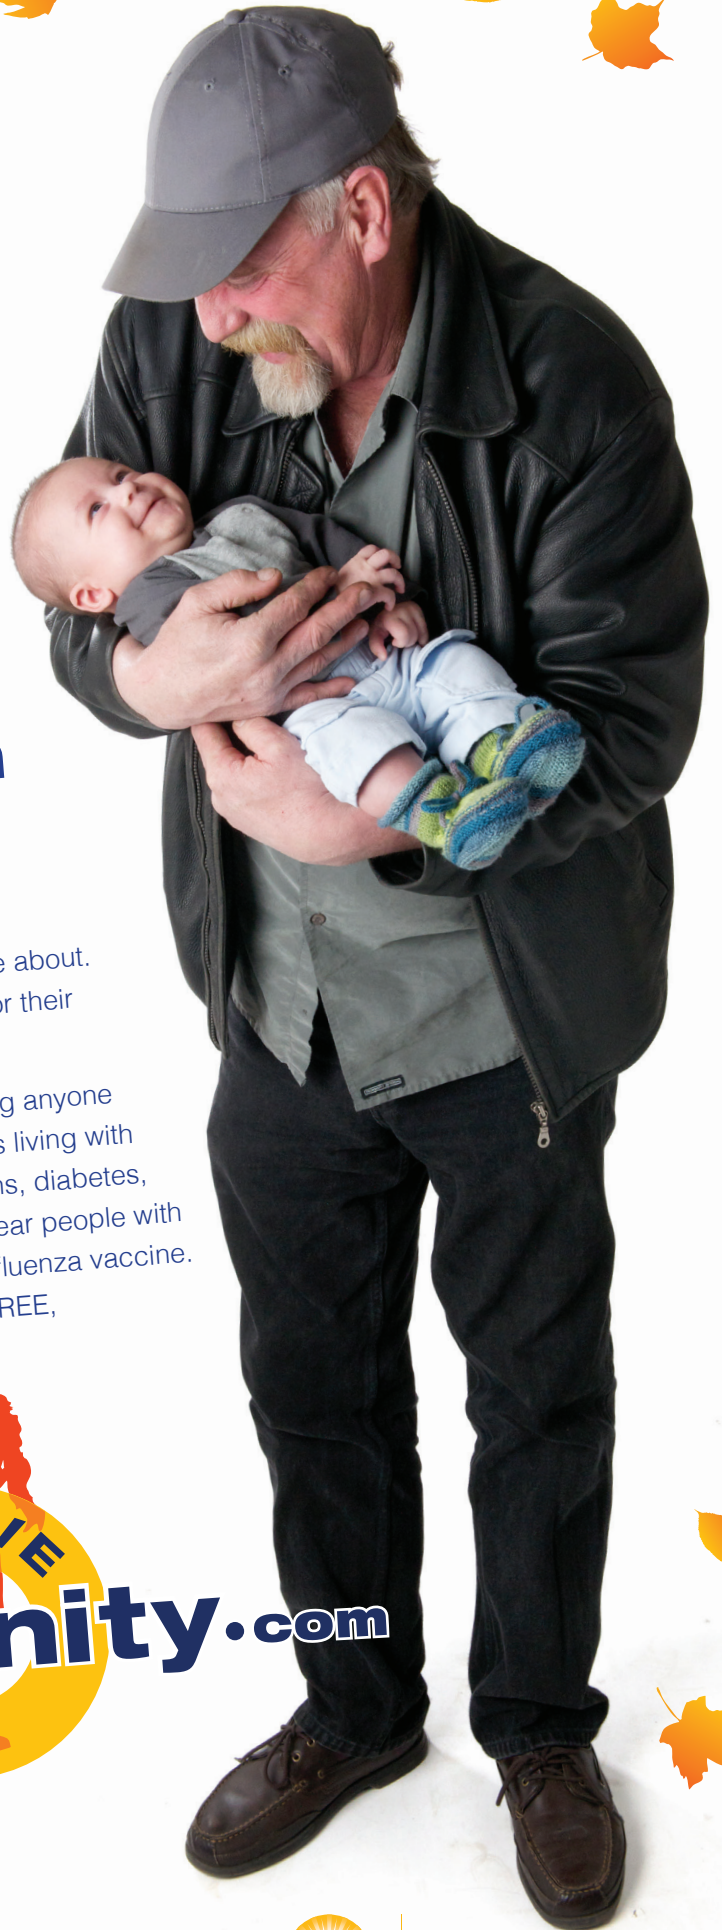

**The Flu shot is FREE for many groups**, including anyone 65 and older, all Aboriginal peoples, children and adults living with a chronic health condition (like heart and lung conditions, diabetes, or arthritis), their household contacts, and more. This year people with mild allergies to eggs can be safely vaccinated with influenza vaccine. For a full list of all those who can get their flu shot for FREE, visit our website.
